## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over AU38285/93.

AU38285/93 discloses a steam generating device (1127B) adjacent to a heating element (121) in an oven compartment wherein the steam generating device is closed at one end and having a steam outlet at the other end, a heat sink member (140) in the steam generation chamber, a steaming water pipe (134) with one nozzle to direct water into steam generating device, and a cover (37). AU3825/93 does not disclose a cover which extends the length of the steam generation chamber. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have included a cover which extends the length of the steam generation chamber as a matter of design choice and would be in the realm of one of ordinary skill.
